Education

B.Sc. (Eng.) in Computer Science and Engineering

Comilla University | CGPA 3.30 out of 4.00

January 2020 – July 2025

Experience

Associate Software Engineer

Jan 2026 – Current

Nifty Coders

Full-time, Hybrid

- Built and maintained web applications using Node.js, Express, React, and SQL, following proper version control workflows with Git.
- Developed and integrated payment systems using Stripe and Komoju for a client, handling multiple subscription plans, recurring billing, and profit-sharing logic.

Trainee Software Engineer

Aug 2025 – Dec 2025

Nifty Coders

Full-time, Hybrid

- Gained hands-on experience with CSharp, .NET, SQL, Angular and Git by building and maintaining practice applications with proper version control workflows.
- Built an end-to-end model fine-tuning pipeline, including automated training and deployment stages using GitLab CI/CD.

Key Skills

Programming Languages: C, C++, JavaScript, SQL, Golang, Python

Web Frameworks: React, Express (Node.js), Gin (Go)

API Development: REST API, Postman, Authentication/Authorization, JWT

DevOps & Tools: Docker, GitHub CI/CD, Git, VS Code, Linux, LangChain, LangGraph

Projects [🔗 All Projects](#)

Borno: A Bangla-Based Programming Language [Source Code](#)

- Developed Borno, a programming language with Bangla keywords and syntax, featuring a Go-based tree-walk interpreter with custom lexer and parser.
- Enables native Bangla speakers to learn and practice programming in their mother tongue, making coding more accessible and culturally relevant.
- Tools: **Golang, Interpreter**

Github RAG [Source Code](#)

- Built a GitHub RAG (Retrieval-Augmented Generation) application capable of conversing with codebases by indexing repository files and providing context-aware responses.
- Enables developers to understand, navigate, and query GitHub repositories efficiently through intelligent retrieval and LLM-powered summarization.
- Tools: **Python, LangChain, FastAPI, Vector Databases (e.g., FAISS/Chroma), GitHub API, Angular**

NLSQL - Natural Language to SQL using LLM [Source Code](#)

- Developed a web app to convert natural language into SQL for PostgreSQL, MySQL using LLMs, with schema browsing, query validation, and paginated result display.
- Enables users to query databases using natural language, bridging the gap between non-technical users and complex data retrieval.
- Tools: **Golang, React, SQL, Gin, LLM, AI, Docker, Rest API**
